## E-Newsletter—January 2008

### Product News!

Cranford Controls is pleased to announce their brand new innovative product, their VSO sounder beacon. Due for launch early 2008 Cranford's VSO sounder beacon is guaranteed to be a huge success with it being the first platform sounder to guarantee a full light output of 360°. With no other one like it on the market, the VSO's lens is highly unique and specially designed to ensure light is diffused out in all directions.

When released the VSO sounder beacon will be available with a clear LED ring and in 32 tone choice. This will also be compliant with the DDA standard, providing both visual and audible alert.

### On the Up and UP...

With Cranford Controls being a constantly growing and successful company they have already

outgrown their purpose-built facility.

As a result

Cranford is pleased to announce that they have now had the first floor of their premises converted into brand new offices, making way downstairs for the expanding R+D Department, the anechoic chamber, and also providing production with extra space for their ever growing output.

To order or for more information:

Tel: +44 (0) 1420 592 444

Fax: +44 (0) 1420 592 445

### Announcements!

\*\* We are delighted to announce that Katy Green, Operations Director, gave birth to a healthy baby boy, Ryan Daniel, on the 11th November. Both mother and baby are doing well!\*\*

\*\* We have now dropped our minimum order charge!\*\*

\*\* We are now registered distributors of Fireco products—adding the Dorgard, Deafgard and System X to our constantly expanding product portfolio.\*\*

### Shhh...quiet...

Cranford Controls has recently installed an anechoic chamber to facilitate them for specialised in-house testing. The chamber is acoustically silent, being constructed with echo suppressing features and with isolation to keep out any noise present in the external environment, enabling only the acoustics of the source to be monitored.

### Exhibition News!

Cranford Controls will be exhibiting at both FireX South and FireX North.

FireX South is occurring over 11-12 March 2008 at Sandown, and Cranford Controls will be situated at stand H8.

During 21-22 October 2008 will be FireX North at Harrogate, here, Cranford Controls can be found at stand A42.

Please be sure to come and visit us!

**We would like to take this opportunity to wish all of you the best for a successful and prosperous 2008!**
